

With you EVERY STEP OF THE WAY

Our commitment to you starts with an individualized program customized to your facility's needs and complete support every step of the way.

**Comprehensive Therapy
 Implementation Program**

Ongoing Clinical Education

**24/7 Clinical Support
 Help-line**

24/7 Technical Support

Experience data-driven CRRT with TRUEVUE Analytics

Our powerful analytics software lets you easily look at benchmarks and trends in your CRRT program for opportunities to:

- Improve filter life
- Manage lost treatment time
- Track dose delivery vs target
- Understand fluid removal rate trends

For more information, ask your Baxter representative
 or call **800-525-2623**

The PRISMAX control unit is intended for:

Continuous Renal Replacement Therapy (CRRT) for patients weighing 20 kilograms or more with acute renal failure and/or fluid overload.

Therapeutic Plasma Exchange Therapy (TPE) for patients with diseases where removal of plasma components is indicated.

Rx Only. For the safe and proper use of the devices mentioned herein, please refer to the appropriate Operator's Manual.

Baxter

WHAT IF
 you could maximize
 accuracy and simplicity
 in CRRT?

Introducing the all new
PRISMAX System.

CRRT BUILT FOR **YOUR** ICU.

WHAT IF you could...

- Improve treatment **ACCURACY** and system **PERFORMANCE**?
- Increase workflow **EFFICIENCY** with less device interactions?
- **SIMPLIFY** setup and delivery of CRRT?

When you choose Baxter for your CRRT program, you're not only choosing industry-leading technology, you are also selecting a partner dedicated to optimizing your clinical success. We asked more than **650** ICU healthcare professionals from **over 50 ICUs** around the world what it would take to solve their greatest challenges in acute care. The **PRISMAX** system was designed to help meet these needs, building upon Baxter's **PRISMAFLEX** technology and 20+ years experience in advancing critical care delivery.

It's CRRT built for **YOUR** ICU.

Intelligent fluid management

Auto-effluent drain

Precise gravimetric weighing of effluent, now with the choice of disposal using a bag or a drain

Fluid-removal catch-up

Uses intelligent pump adjustments to help meet prescribed fluid removal targets

Color-coded scales

With supplementary LEDs, quickly identify the bag needing intervention

Liquid level sensor

Automatically adjusts fluid height in the deaeration chamber, reducing the need to perform this function manually

Intuitive user interface

Color-coded, step-by-step instructions help simplify setup and therapy management

Adjustable high-resolution screen

Helps make checking therapy easier with a 15" display that tilts and rotates

Therapy profiles

Save customized prescription settings for consistency and to accelerate setup

Smart alarms

Reduce device interactions and treatment interruptions

- Scale stability software helps prevent false alarms
- Advanced pressure management minimizes sudden pressure spikes

Innovative THERMAX blood warmer

Designed for effective temperature management. Enables precise control of blood return temperature between 35°C and 38°C[†], all managed through the **PRISMAX** system interface.

[†]Cooling only through therapy fluids, no active cooling of blood through the warmer
