# Research and Innovation

Stanford Children's Health offers access to some of the best minds in medicine, science, and innovation

Our Stanford physician-scientists are at the forefront of discoveries and are actively translating them to benefit children's health. The ultimate goal is to bridge the gap between transformational discovery and cures that can save lives. Whether it's accelerating new treatments for diseases or launching new technologies specifically tailored to children, our focus is translating discoveries from the laboratory bench right to the patient's bedside.

anesthesiologists

250+

CVICU and cardiac  
specialist nurses

5

radiologists specializing  
in cardiac imaging

Exceptional outcomes  
for even the toughest cases.

# Brain and Behavior Center

One of the biggest pediatric brain and behavior programs in the country and ranked #8 in pediatric neurology and neurosurgery by *U.S. News & World Report*

Our name illustrates our dual focus on providing innovative cures and treatments for infants, children, and adolescents with disorders of brain development, function, and behavior. Our core team of 35 physician-scientists forges multidisciplinary collaborations to bring treatment innovations to thousands of young patients every year.

26,000+

outpatient visits a year in neurology and neurosurgery

175

pediatric neurology and neurosurgery clinical trials and studies underway

10

dedicated epileptologists

4,100+

EEGs performed annually

45+

neurological, behavioral, and mental health programs available

# Pediatric Transplant Center

A national leader in pediatric solid-organ transplants

With more than 25 years of experience performing pediatric organ transplants, we also are the U.S. leader in combined heart-liver transplants, and we treat a growing number of children needing heart-kidney, liver-lung, liver-intestine, liver-intestine-pancreas, and liver-kidney transplants. In 2021, we were #1 in the Western United States in organ transplant volume in patients 18 years and younger, and No. 2 nationwide.

# Johnson Center for Pregnancy and Newborn Services

Ranked #3 in the nation by *U.S. News & World Report*

We are the only Northern California children's hospital to offer obstetric, neonatal, and developmental medical services all in one place.

## 4,500+

babies delivered each year

## 26,800+

ultrasounds performed each year

## 1 of 43

NAFTNet centers in North America

## 200+

perinatal and neonatal partners working to improve maternal and neonatal outcomes as part of the Stanford-led CMPQCC\*

## 26

neonatal trials currently underway

Our world-class services include:

- Fertility and reproductive health
- Perinatal diagnostics
- Fetal and pregnancy health
- Obstetrics (general and high-risk/MFM)
- Placental disorders
- Labor and delivery
- Maternity care
- Neonatal and developmental medicine

\*California Maternal and Perinatal Quality Care Collaboratives

# Bass Center for Childhood Cancer and Blood Diseases

Combining cutting-edge research and excellent care to support each patient and family

We have decades of pediatric expertise, including:

**900+**

inpatient discharges each year

**13,000+**

outpatient visits each year

**1,000+**

pediatric stem cell transplants performed since the program was established in 1986

**50+**

stem cell  
transplants  
in FY2019

**51**

pediatric  
hematologists-  
oncologists

Our robust research program is committed to bringing cures from the lab bench to the patient's bedside.

**120+**

clinical trials  
currently underway

**First-in-  
human**

trials in CAR T-cell  
therapy,  $\alpha\beta$  T-cell  
depleted haploidentical  
stem cell transplantation,  
and gene therapy

# Pulmonary, Asthma and Sleep Medicine Center

Ranked #6 nationally and the top pediatric pulmonology program on the West Coast by *U.S. News & World Report*

With 22 pediatric pulmonologists—the most of any children's hospital in California—we have experience helping patients with any lung or breathing condition.

## 10,000+

outpatient visits per year

## 20

clinical trials  
currently underway

We treat all pediatric lung and breathing issues, including:

- Asthma
- Bronchopulmonary dysplasia
- Cystic fibrosis
- Interstitial lung disease
- Lung transplant
- Neuromuscular disorders
- Primary ciliary dyskinesia
- Sleep problems
- Swallowing disorders

# Children's Orthopedic and Sports Medicine Center

With 18 pediatric-specific providers and six locations, we're the most comprehensive pediatric orthopedic program in Northern California.

## 30,600

annual visits

## 146 1,519+

annual Motion  
and Sports  
Performance  
Laboratory visits

surgeries performed  
each year

## 29,550+

annual rehabilitation visits

We have programs to care for issues of every bone and musculoskeletal system in the body, including:

- Bone and soft tissue tumors
- Foot and ankle
- Hand and upper limb
- Hip preservation
- Neuromuscular disorders
- Spine health
- Sports medicine

Lucile Packard Children's Hospital Stanford is one of America's most technologically advanced, family-friendly, and environmentally sustainable hospitals for children and expectant mothers.

**521,000**

square feet of additional building space,  
more than doubling our former hospital size

**361** 

beds at our Palo Alto campus

Proudly ranked as a top  
10 children's hospital in  
the nation by *U.S. News  
and World Report*

- Magnet Recognized Organization
- Highest honor for nursing excellence reflecting exemplary professional nursing practice and preeminent patient care

- LEED Platinum certified
- One of two children's hospitals in the world to earn the highest designation for sustainability

Our Level I Pediatric Trauma Center is one of only five in California

Stanford Children's Health is the largest health care network in the Bay Area—and one of the few in the country—exclusively dedicated to pediatric and obstetric care. With Lucile Packard Children's Hospital Stanford at our center, we bring world-renowned Stanford expertise and innovation to specialty service locations, general pediatric and obstetric practices, and partnerships with community hospitals, regional centers, and top hospitals across the U.S. Western region.
