

Education.

**The University of Rochester...
deeply rooted in a legacy of
innovation as the home of the
biopsychosocial model of care.**

The Department of Pediatrics at the University of Rochester/UR Medicine Golisano Children's Hospital offers an exceptional educational experience for trainees at all levels and career tracks. Our program values teamwork in the pursuit of excellence, and a supportive, inclusive, and diverse environment.

- A learning environment that fosters resident autonomy, supports resident well-being, and emphasizes care for the entire patient.
- Tailored to career objectives, with a variety of tracks and opportunities to pursue combined and dual fellowship curricula.
- Our Med-Peds program, established in 1967, is one of the first and best in the nation.
- Our first in the nation Pediatric Links with the Community program develops novel methods to train leaders in community health and advocacy.
- As one of eight "CLER Innovators" selected by the ACGME, we are part of a national movement to develop unique approaches to improve quality and safety in the learning environment.

Community.

The University of Rochester... birthplace of Community Pediatrics and Adolescent Medicine.

The Department of Pediatrics at the University of Rochester/UR Medicine Golisano Children's Hospital works in partnership with a vibrant community of child focused leaders and organizations with the shared goal of promoting the health and well-being of ALL children in our community. We are a national leader in community health and advocacy education, through our Pediatric Links with the Community program.

- Home of the internationally recognized and implemented Nurse Family Partnership Home Visitation Approach.
- Reducing teen pregnancy through reproductive counseling and provision of LARC embedded in our pediatric practices throughout the community.
- Implementing innovative systems to improve maternal-child health by partnering with Ob/Gyn, Psychology and Nursing.
- Leading partnerships within our community to improve the "First 1000 Days," and to ensure Behavioral Health for all of our kids and families.
- Developing a fully functional, integrated data platform between health, education, human services and families.

Research.

**The University of Rochester...
scientists contributing foundational
work to advances in pediatric
health care.**

The Department of Pediatrics at the University of Rochester/UR Medicine Golisano Children's Hospital houses some of the world's premier fundamental and clinical biomedical researchers in interdisciplinary centers, with cutting-edge laboratory and clinical research facilities in close proximity. Our culture emphasizes multi-disciplinary collaboration, promoting intellectual interaction and translation of advances from the bench to the bedside.

- Birthplace of neonatal surfactant replacement therapy.
- Innovator in infectious disease research and vaccine development, from Hib to HPV.
- Developing breakthroughs in Autism Spectrum Disorder interventions.
- Championing school-based, telemedicine-enabled asthma management.
- Transforming our understanding of allergic diseases.

Clinical.

**The University of Rochester...
a leader in discovery and innovative
care yesterday, today and tomorrow.**

The Department of Pediatrics at the University of Rochester/UR Medicine Golisano Children's Hospital serves as the referral center for the 17-county Finger Lakes region, serving more than 85,000 children and their families each year.

Our missions are to provide comprehensive care for children and their families, educate future pediatricians and pediatric specialists, and perform progressive research that will lead to the medical breakthroughs of tomorrow.

This means continuity of care for our patients, coordinated services for our families, and an unparalleled teaching and mentoring environment for our residents, fellows and students.

- The birthplace of the biopsychosocial model of care.
- Recognized as a national leader for community pediatrics and academic General Pediatrics.
- A leading advocate for breastfeeding for nearly half a century.
- An innovator and champion for telemedicine in underserved primary care settings.
- The first children's hospital in the country with an integrated PET/MRI.
